

Aluminum Extrusion Wall Frame, Flat Shape Open System, 28mm x 2.44m

- Flat profile measures 28mm thick for a low-profile wall frame
- Extrusion length of 2.44m per section for modular assembly
- Constructed from aluminum for corrosion resistance indoors and outdoors
- Open-system design allows field cutting and repositioning
- Backed by a 1-year warranty

OVERVIEW

The 5-WF96-28 is an aluminum extrusion profile designed for open-system wall frame construction. With a 28mm flat profile and 2.44m length, it is suited for a range of commercial and light industrial framing applications where a modular, field-adjustable structure is required.

Constructed from aluminum, the extrusion offers inherent corrosion resistance for both indoor and outdoor environments. The flat profile provides structural stability, and the open-system design allows the frame to be cut, repositioned, or modified on-site to accommodate changing layout requirements.

The product carries a 1-year warranty.

SPECIFICATIONS

OPTICAL

LED Lifetime 50,000 h

MECHANICAL

Product Dimensions 28mm x 2.44m

Length 2.44 m
8.0 ft

Material Aluminum

ORDERING

Warranty 1 y

APPLICATIONS

- Commercial wall partition framing
- Light industrial modular structures
- Trade show and exhibit wall systems
- Retail display wall construction
