

RGBIC Color Female Connector for LED Sheet Installations

- Female connector type for RGBIC LED sheet termination
- Supports combined electrical and color signal connection
- Designed specifically for compatibility with LED sheet products
- Suited for RGBIC color-controlled lighting circuits

OVERVIEW

The 7-FS9-CON-CA3-F is an RGBIC color female connector designed for use with compatible LED sheet products in commercial indoor lighting applications, including backlit stone panels. It provides a termination point for RGBIC LED sheet runs, enabling secure electrical and signal connections between sheet segments or control leads.

The connector supports color-controlled lighting circuits, maintaining continuity of both power and RGBIC signal data across joined LED sheet sections in architectural installations.

APPLICATIONS

- Backlit stone panel installations
- RGBIC LED sheet connections
- Architectural accent lighting systems
- Commercial indoor lighting fixtures
