

Single Color Double-End Connector for LED Sheet, Backlit Stone Applications

- Double-end configuration connects LED sheet runs at both termination points
- Designed for single-color LED sheet circuits
- Supports electrical continuity across joined LED sheet sections
- Suited for backlit stone panel and architectural LED sheet installations

OVERVIEW

The 7-FS9-COND-CA2 is a single-color double-end connector designed for use with LED sheet lighting. It provides a termination solution for connecting LED sheet runs at both ends, supporting electrical continuity in commercial and architectural LED sheet installations.

The connector is intended for use with LED sheets installed behind backlit stone panels and similar architectural surfaces, allowing runs to be joined without soldering.

APPLICATIONS

- Backlit stone panel installations
- Architectural feature walls
- Commercial LED sheet lighting runs
- Illuminated countertops and reception desks
