

RGBCCT Double-End Connectors for LED Sheet Lighting

- Double-end connector configuration for RGBCCT LED sheets
- Supports full-color RGB plus dual white-channel (CCT) control
- Designed specifically for LED sheet-format lighting products
- Maintains electrical and signal continuity at both sheet ends

OVERVIEW

The 7-FS9-COND-CA6 is a set of RGBCCT double-end connectors designed for use with LED sheet lighting. These connectors join both ends of an RGBCCT LED sheet, supporting full-color plus dual white-channel signal and power continuity in sheet-format LED installations.

The double-end design allows connection at each termination point of the LED sheet, maintaining consistent RGBCCT signal transfer across the run for backlit stone and similar sheet-lighting applications.

APPLICATIONS

- Backlit stone panels
- LED sheet lighting installations
- Architectural feature walls
- Commercial display backlighting
