

8 ft T8 V-Shape Integrated LED Tube, 40–60W Selectable, 6-CCT Tunable, ETL Listed

OVERVIEW

The 8 ft T8 V-Shape Integrated LED Tube (SKU: 8-T8x2-8-6PS-6CCT-ETL) is a direct-wire, integrated lamp designed for commercial and industrial fluorescent fixture retrofits. The aluminum-PC construction promotes heat dissipation, and the mercury-free design supports responsible disposal and environmental compliance.

This tube features six selectable wattage and six selectable CCT options in a single unit, reducing inventory requirements for facilities managing multiple lighting zones. It is rated for 50,000 hours of operation and carries a 5-year warranty. The tube measures 93.50 inches in length with a 1.30-inch profile.

ETL listing is indicated on the product label. No additional certification details were confirmed in the available source documentation. The 5-year warranty applies as stated by the manufacturer.
