

Accessories Kit for 8-T8x2 Integrated LED Tube — Clips, Joint & Anchors

OVERVIEW

The 8-T8x2-Accessories kit supplies the mounting hardware required for installing LUMIPRO D2 Series integrated LED tube fixtures. The kit includes two mounting clips with screws, one joint connector, and two green screw anchors. It is designed specifically for use with 8-T8x2 series double-row integrated LED tubes in commercial and industrial applications such as warehouses, offices, supermarkets, and garages.

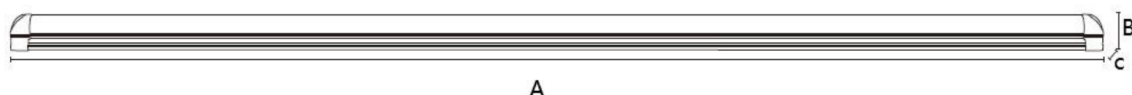

These components support the series-connection installation method used by the D2 fixture line, enabling secure surface or suspended mounting. The joint connector facilitates end-to-end linking of multiple tube runs, while the included anchors and clips provide stable mechanical attachment to a variety of ceiling and surface substrates. All hardware is matched to the 1.38-inch width profile of the 8-T8x2 tube family.

No independent certifications are confirmed for this accessory kit in the available source documentation. Warranty coverage follows the terms applicable to the associated 8-T8x2 fixture, which the datasheet lists as either a 5-year or 3-year term depending on configuration. Consult the fixture's documentation for full compliance and warranty details.

SPECIFICATIONS

Power	10–60 W	Input voltage	100–277 VAC
Luminous flux	130 lm/W (efficacy) lm/W	Dimensions	[object Object] in
CCT	3000–6000 K	Rated life	50000 hr
CRI	80	Warranty	3–5 years
Beam angle	120 °	Operating temp	-20 to 45 °C
