

## Architectural Linear Grid Suspension Flexible Mounting Clip, Square, Black

### OVERVIEW

The 9-LG-Z-ClipS-BK is a square flexible mounting clip designed for suspension installation of the Architectural Linear Grid (SL8860 Series) magnetic linkable linear luminaires. It serves as a suspension splicing accessory, securing the luminaire body while routing the AC wire through the clip during pendant-mount configurations. Intended for use by electrical contractors and lighting installers working with the SL8860 series in commercial ceiling applications.

This clip is finished in black to coordinate with black-finish luminaire configurations available in the SL8860 series. It is designed for tool-free, quick-connect suspension setups consistent with the series' magnetic seamless linkable installation system.
