

Architectural Linear Grid Suspension Flexible Mounting Clip, Square, White

OVERVIEW

The 9-LG-Z-ClipS-WT is a square flexible mounting clip designed for suspension installation of the Architectural Linear Grid (SL8860 Series) magnetic linkable linear luminaires. It serves as a structural accessory that secures the luminaire body during pendant-style deployments in commercial ceiling applications.

This clip is finished in white to coordinate with white-configured SL8860 series fixtures. It is intended for use as part of the suspension mounting hardware assembly, accommodating the wire inlet routing required for suspended direct and indirect lighting configurations.
