

L-Type Joint Connector for 9-LP Linear Light, 3-CCT, Black (RAL9011)

OVERVIEW

The 9-LP-Z-CNT-L-BK is an L-type joint connector designed for use with the 9-LP series LED linear light system. It enables L-type connections between linear runs, supporting CCT and power selectable configurations. The black finish (RAL9011) is suited for installations where fixture hardware should coordinate with dark housing options.

The connector uses a buckle-joint mechanism for fast, stable assembly without additional tools, reducing installation labor. It is compatible with the 9-LP series CCT-selectable variant, which supports 3000K, 4000K, and 5000K color temperatures and wattage selection across multiple fixture lengths.

SPECIFICATIONS

| | | | |
|----------------------|------------------|----------------------|---------------------------|
| Power | 20-24-30 W | CRI | >80 |
| Luminous flux | 115 lm/W | Input voltage | 120-277 / 120-347 V |
| CCT | 3000-4000-5000 K | Dimensions | 4FT / L1084mm body length |
