

L-Type Joint Connector for 9-LP Linear Light, 3CCT, White

OVERVIEW

The 9-LP-Z-CNT-L-WT is an L-type joint connector designed for use with the 9-LP series linear light fixture. It enables secure, tool-free linking of individual light runs at 90-degree corners, supporting continuous and uniform illumination across connected segments. The connector is finished in white (RAL9016) to match the white housing variant of the 9-LP series.

This connector is compatible with the 9-LP system's buckle-joint quick-connect mechanism, which is designed to reduce installation labor and maintain a consistent aesthetic across multi-segment layouts. It is rated for 3CCT configurations, accommodating the selectable 3000K, 4000K, and 5000K color temperature options available in the 9-LP fixture line.

SPECIFICATIONS

Power	20/24/30 W	CRI	>80
Luminous flux	115 lm/W	Input voltage	120-277 / 120-347 V
CCT	3000/4000/5000 K
