

Stainless Steel Suspension Kit with SS Rope for Linear Lights, 1.8M, 2-Pack

OVERVIEW

The 9-LP-Z-WIRE Suspension Kit is designed for hanging linear LED light fixtures from ceilings using stainless steel rope slings. Each kit includes all necessary hardware for a complete installation.

The kit is constructed from stainless steel throughout, including the rope and mounting hardware. Each package contains two complete suspension assemblies, with components including pan head machine screws (M5x6), self-tapping screws (4x30), wall plugs (6x30), and stainless steel rope slings. The stainless steel construction provides corrosion resistance suitable for commercial environments.
