

## Surface Mount Frame Kit for 2x4 ft LED Flat Panels, H55mm Profile, White

### OVERVIEW

---

The 9-PZ-FRAME-2x4 is a surface mount frame kit designed to install 2 ft x 4 ft EdgeLit or BackLit LED flat panels onto ceilings or walls without requiring a drop-grid or recessed opening. The H55mm profile provides a low-depth mounting solution suitable for commercial and industrial spaces where standard T-bar grid systems are unavailable or impractical.

The frame is finished in white and constructed to securely retain a standard 2x4 panel format. Carton packaging accommodates 20 units per carton at a gross weight of 19.8 kg, indicating a robust aluminum or steel profile construction appropriate for professional installation environments.

No certifications, compliance listings, or warranty terms are confirmed in the available source documentation. Contractors and specifiers should contact Poli LED & Signs directly to obtain current compliance and warranty information before specifying this product for a project.
