OVERVIEW

The 9-W1.8W is a 3-inch square LED wall light designed for both residential and commercial applications. The integrated photocell automatically adjusts output based on ambient light levels, reducing unnecessary energy consumption during daylight hours.

The fixture operates at 1.8W and produces a 6000K daylight color temperature, delivering crisp, clear white light suited for entryways, corridors, and exterior accent positions. It accepts a wide input voltage range of 120-240V and is finished in white.

The LED source is rated for 50,000 hours of operation, and the fixture carries a 1-year warranty.
