

LED Square Downlight Kit, 6.5 In. Aperture, 6000K, with Dimming Driver

- 6.5 in. squared aperture downlight fixture
- 6000K correlated color temperature
- Aluminum housing for thermal management
- White finish for ceiling coordination
- Includes D-D18M/0.3 dimming driver

OVERVIEW

The GL2 Series 6.5 In. Square LED Downlight Kit pairs a squared-aperture downlight fixture with a D-D18M/0.3 dimming driver at a 6000K correlated color temperature. The kit suits commercial and industrial ceiling installations where a compact square profile and integrated dimming are required. Aluminum construction with a white finish supports thermal management and coordinates with standard ceiling finishes in recessed mounting applications.
