

8-Inch Connector with E27 Socket for Retrofit Downlight, 18 AWG Cable

- 8-inch connector length for retrofit downlight wiring runs
- E27 socket base for standard lamp compatibility
- 18 AWG cable construction for electrical conductivity
- 50,000-hour rated LED lifetime
- 1-year warranty coverage

OVERVIEW

The A-RZ-CON is an 8-inch connector with an E27 socket designed for retrofit downlight applications. It provides a straightforward interface for integrating E27-base lamps into retrofit installations, supporting power transmission through its 18 AWG cable construction.

The E27 socket accommodates standard E27-base lamps, and the 18 AWG cable is sized for reliable electrical conductivity in retrofit downlight configurations. The connector is built for ease of installation in lighting upgrade projects.

Associated LED components carry a rated lifetime of 50,000 hours and a 1-year warranty.
