

8-Inch New Construction Rough-In Plate for Recessed LED Downlights

- 8-inch size fits various ceiling types and construction layouts
- Compatible with standard electrical junction boxes
- Durable construction suited for residential and commercial projects
- Supports LED downlights rated for 50,000-hour lifetime
- Backed by a 1-year warranty
- Designed to meet applicable safety regulations and electrical codes

OVERVIEW

The A-Z-PLATE8 is an 8-inch new construction rough-in plate designed for use with recessed LED downlights in residential and commercial ceiling installations. It provides a stable, precise mounting foundation during the rough-in phase of construction, ensuring accurate downlight positioning before finish work is complete.

Constructed from durable materials, the plate is compatible with standard electrical junction boxes and is designed to meet applicable safety regulations and electrical codes. Its straightforward design supports efficient installation and a clean finished appearance across a range of ceiling types.

The plate is intended for use with LED downlights rated for a 50,000-hour lifetime and is backed by a 1-year warranty.
