

WPC Co-Extrusion Deck Edge Board, Antique, 86.6 x 2.75 x 0.43 In.

OVERVIEW

The B-D1-AT-EDGE is a WPC (Wood Composite Polymer) co-extrusion deck edge board finished in Antique color, measuring 86.6 x 2.75 x 0.43 inches. It is designed for exterior decking perimeter applications where a clean, finished edge profile is required.

Constructed using co-extrusion technology, the board features a high-density recycled plastic and wood fiber inner core encased in a 360-degree polymer outer layer. This construction provides waterproof performance, UV resistance, anti-scratch and wear resistance, stain resistance, and a slip-resistant 3D wood grain surface texture. The product is maintenance-free and rated for a 25-year service life.

SPECIFICATIONS
