

## WPC Co-Extrusion Deck Edge Board 86.6x2.75x0.43 In. Ashwood

### OVERVIEW

The B-D1-AW-EDGE is a WPC (Wood Composite Polymer) co-extrusion deck edge board designed for exterior decking applications. Measuring 86.6 x 2.75 x 0.43 inches in Ashwood color, it provides a finished edge profile for WPC deck installations in residential and commercial environments.

Constructed using co-extrusion technology, the board features a high-density recycled plastic and wood fiber inner core encased in a protective polymer outer layer. This construction provides waterproof performance, UV resistance, slip resistance via a 3D wood grain texture, and resistance to staining and scratching. The product requires no ongoing maintenance and carries a 25-year rated service life.
