

WPC No-Gap Composite Decking Board, 144 x 5.7 x 0.9 In., Ashwood

OVERVIEW

The Ashwood No-Gap WPC Decking Board is a co-extruded wood-plastic composite panel designed for exterior decking applications. Each board measures 144 in. x 5.7 in. x 0.9 in. and installs using a hidden clip system that produces a seamless, gap-free surface suitable for residential and commercial outdoor environments.

The board uses a dual-layer co-extrusion construction: a high-density recycled plastic and wood fiber inner core with a patented polymer outer coating that provides 360-degree protection. Rated characteristics include waterproof performance, UV resistance, anti-scratch and wear resistance, slip resistance via a 3D wood-grain texture, and stain resistance. The product carries a 25-year rated service life and requires no routine maintenance.

The manufacturer lists a 5-year warranty on this product.

SPECIFICATIONS

Material	WPC (Wood Composite Polymer)	Weight Lb	22 lb
Length In	144 in	Lifetime Years	25 years
Width In	5.7 in	Warranty	5 years
Height In	0.9 in	Certifications	CE, SGS, ISO

INSTALLATION
