

Large Pedestal Base, 160 - 260mm Adjustable Height, PP Material, Fits All Decking Models

- Adjustable height range of 160 - 260mm for slope and substrate correction
- Molded from polypropylene (PP) for moisture and corrosion resistance
- Black finish suited to exposed outdoor decking applications
- Water-resistant environmental rating for outdoor installation
- Compatible with all decking models in the product line
- Backed by a 1-year manufacturer warranty

OVERVIEW

The B-D1-B260-PEDESTAL is a pedestal base designed for elevated decking installations. With an adjustable height range of 160 - 260mm, it accommodates varying substrate conditions and slope corrections commonly encountered in commercial and residential deck construction. The base is compatible with all decking models in the product line, making it a versatile support solution across project configurations.

Constructed from polypropylene (PP) with a black finish, the base carries a water-resistant environmental rating suited to outdoor decking environments where long-term material stability is a priority.

The pedestal base is backed by a 1-year warranty.
