

WPC No-Gap Composite Decking Board, 144 x 5.7 x 0.9 In., Dark Grey

OVERVIEW

The B-D1-DG is a Dark Grey WPC (Wood Composite Polymer) no-gap composite decking board measuring 144 x 5.7 x 0.9 in., designed for exterior decking applications in residential and commercial settings. It is manufactured using co-extrusion technology, in which a protective polymer outer layer and a high-density recycled plastic and wood fiber inner layer are processed simultaneously, resulting in 360-degree surface protection.

The outer polymer coating provides UV resistance, anti-scratch and wear resistance, stain resistance, and a slip-resistant 3D wood grain texture. The no-gap profile eliminates the open joints found in traditional decking systems. The board carries a waterproof environmental rating and a 25-year rated service life. Installation uses a patented side-clip system compatible with standard decking joists; no face screwing is required.

The manufacturer states a 5-year product warranty. CE, SGS, and ISO certifications are listed in the datasheet; however, specific certification numbers and scope have not been independently confirmed. Buyers requiring documentation should request copies prior to specification.

SPECIFICATIONS

Material	WPC (Wood Composite Polymer)	Warranty	5 years
Length In	144 in	Certifications	CE, SGS, ISO
Width In	5.7 in	Colors Available	Ashwood, Antique, Teak, Walnut, Ipe, Dark Grey
Height In	0.9 in	Waterproof	Waterproof
Weight Lb	22 lb	Eco Friendly	100% eco-friendly
Lifetime Years	25 years	Construction	Co-extrusion capped decking; high-density recycled plastic and wood fiber inner layer

INSTALLATION

with polymer outer coating
