

Decking Screws and Clips for WPC Board Installation — 25 Pieces per sq. m

OVERVIEW

Decking screws and clips designed for use with WPC (Wood Plastic Composite) board installations. These fasteners secure decking boards to aluminum joists and join boards to one another, providing a stable, concealed fixing system. Installation requires 25 pieces per square meter.

The clip system includes two clip types (Clip A and Clip B) that engage the side channels of the decking boards. Clip B is positioned at the midpoint of each board, while Clip A is used at remaining fixing points. Screws are driven from the top of each clip to lock the board firmly to the joist before the next board is placed.

SPECIFICATIONS

Material	WPC (Wood Composite Polymer)	Dimensions	144 x 5.7 x 0.9 in
Warranty	5 years	Certifications	CE, SGS, ISO
Rated Life Years	25 years
