

Full Trellis LED Sign Kit, Ash Wood Face, Aluminum Post, Commercial Signage

- Ash wood face panel provides a natural wood grain appearance
- Aluminum post offers corrosion-resistant structural support
- Full trellis frame design creates an open-lattice sign display
- Kit includes both sign face and post components for assembly

OVERVIEW

The B-F1-AW-FULL-AL-KIT is a full trellis LED sign kit combining an ash wood face panel with an aluminum support post, designed for commercial and retail identification signage where a natural wood appearance is paired with structural durability. The full trellis configuration provides an open-lattice frame suitable for storefronts, monument signs, and property entrance displays. The kit is supplied as a complete assembly, pairing the wood face component with the aluminum post for on-site installation.
