

# Full Trellis Sign Frame, Ash Wood Construction, Black Post Mount

- Ash wood frame construction
- Full trellis lattice configuration
- Black finish on mounting post
- Kit format includes frame and post components

## OVERVIEW

The B-F1-AW-FULL-BK-KIT is a full trellis sign frame built from ash wood with a black post mount. It is suited for commercial and retail signage applications where a structural wood frame is required to support or surround a sign face.

The frame uses a full trellis configuration, providing an open lattice structure across the sign area, paired with a black-finished post for mounting. This construction is intended for storefronts, hospitality settings, and other installations calling for a wood-frame architectural sign structure.
