

WPC Composite Fence Panel 69.29" x 7.08" x 0.98" – Antique

OVERVIEW

The S-CF01 WPC Composite Fence Panel is a co-extruded wood plastic composite panel designed for commercial and residential perimeter fencing applications. Each panel measures 69.29" (1760mm) in length by 7.08" (180mm) in width by 0.94" (24mm) in height and is available in the Antique color finish. Compatible with Privacy, Mid-Trellis, and Full-Trellis fence system configurations using aluminum structural components.

Constructed using a co-extrusion process that bonds a protective polymer outer layer to a high-density recycled plastic and wood fiber core, the panel provides enhanced resistance to moisture and UV exposure. The 3D wood grain texture is consistent across the Antique colorway. The system's structural posts, rails, brackets, and caps are aluminum with powder-sprayed or anodized finishes. Rated service life is 25 years. Installation requires a 4mm clearance gap between panels and posts.

Certification data was not confirmed in the available source documentation. The product datasheet references CE, SGS, and ISO marks; however, these could not be independently verified from the provided source and are therefore not claimed here. A 10-year warranty is stated in the datasheet.

SPECIFICATIONS

Panel Length Mm	1800 mm	Material Core	WPC (Wood Composite Polymer) — high-density recycled plastic and wood fibers
Panel Width Mm	180 mm	Material Frame	Aluminum
Panel Thickness Mm	24 mm	Certifications	CE, SGS, ISO
Panel Length In	70.87 in	Available Colors	Ashwood, Antique, Teak, Walnut, Ice, Dark Grey
Panel Width In	7.08 in	Environmental Rating	Waterproof, UV protection
Panel Thickness In	0.94 in	Post Dimensions Mm	80 x 80 x 1800 mm
Warranty	10 years	Post Base Dimensions Mm	160 x 100 x 160 mm
Rated Life Years	25 years
