

## WPC Composite Fence Panel 69.29" x 7.08" x 0.98" — Ipe Color

### OVERVIEW

The S-CF01 WPC composite fence panel (model B-F1-CF01-IPE) is a co-extruded wood plastic composite board designed for commercial and residential privacy fencing applications. Measuring 69.29" (1760 mm) in length and 7.08" (180 mm) in width, it is available in an Ipe color finish with a 3D wood grain texture. The panel is used in conjunction with aluminum structural components — including posts, rails, brackets, and caps — to form complete fence sections.

Constructed using a co-extrusion process, the panel consists of a high-density recycled plastic and wood fiber core with a patented polymer outer coating that provides enhanced resistance to moisture and UV exposure. The system is rated for a 25-year service life and carries a 10-year product warranty. Structural framing components are aluminum, finished via powder coating or anodizing depending on the selected color.

### SPECIFICATIONS

<b>Length Mm</b>	1800 mm	<b>Material</b>	WPC (Wood Composite Polymer) co-extrusion with aluminum frame
<b>Width Mm</b>	180 mm	<b>Color</b>	IPE
<b>Thickness Mm</b>	24 mm	<b>Certifications</b>	CE, SGS, ISO
<b>Warranty</b>	10 years	<b>Environmental Rating</b>	Waterproof, UV protection
<b>Rated Life Years</b>	25 years
