

WPC Composite Fence Panel 69.29" x 3.54" x 0.98" - Antique

OVERVIEW

The S-CF02 is a WPC (Wood Plastic Composite) fence panel in the Antique color finish, designed for use in composite fencing systems including mid-trellis and full-trellis configurations. Each panel measures 69.29" (1760mm) in length, 3.54" (90mm) in width, and 0.98" (24mm) in thickness, making it suited for commercial and residential perimeter fencing applications.

Constructed using a co-extrusion process, the panel bonds a protective polymer outer layer to a wood fiber and recycled plastic core. This capped construction provides resistance to moisture and UV exposure. The material carries a rated service life of 25 years. Structural framing components used in conjunction with these panels, including posts, rails, and brackets, are aluminum with powder-coated or anodized finishes.

The system is backed by a 10-year product warranty as stated in the manufacturer documentation. CE, SGS, and ISO certifications are listed in the source datasheet; buyers should request current certification documentation to confirm scope and applicability prior to specification.

SPECIFICATIONS

Length Mm	1800 mm	Rated Life Years	25 years
Width Mm	90 mm	Material	WPC (Wood Composite Polymer) co-extrusion
Height Mm	24 mm	Certifications	CE, SGS, ISO components
Weight Kg	2.64 kg	Environmental Rating	Waterproof, UV protection
Warranty	10 years		

INSTALLATION

PRIVACY DESIGN (L1800MM*H1800MM/ L5.9FT*H5.9FT)
