

Privacy Model LED Sign Post Kit, Dark Grey Finish with Black Post

- Privacy Model configuration for controlled or directional sign visibility
 - Dark grey finish on the sign body component
- Black finish on the support post component
 - Supplied as a coordinated kit pairing post and sign body finishes

OVERVIEW

The B-F1-DG-PR-BK-KIT is a Privacy Model LED sign post kit finished in dark grey with a black post, designed for commercial and industrial signage installations where controlled visibility or directional viewing is required. This kit configuration is suited for property managers and contractors seeking a coordinated sign support solution with a defined aesthetic.

The kit pairs a dark grey sign body with a black post for a two-tone finish that distinguishes it from standard single-color sign post assemblies, supporting installations where a privacy or restricted-view sign configuration is specified.
