

Ipe Mid Trellis Kit, Aluminum Post, Structural Trellis System

- Mid Trellis model configuration for structural trellis assemblies
- Aluminum post construction for the support column
- Ipe wood used in trellis components for natural wood appearance
- Kit format includes components needed for trellis assembly

OVERVIEW

The B-F1-IPE-MID-AL-KIT is an Ipe Mid Trellis model kit featuring an aluminum post, designed for structural trellis applications. The kit pairs Ipe wood components with an aluminum post for a combination of natural wood aesthetics and metal post construction.

This configuration is suited to projects requiring a mid-size trellis structure supported on an aluminum post rather than a wood or masonry column.

SPECIFICATIONS

MECHANICAL

Material	Ipe wood, aluminum
Mounting	Post-mounted

APPLICATIONS

- Outdoor patio trellis structures
- Pergola and shade structure support
