

Ipe Privacy Model Aluminum Post Kit

- Ipe wood construction for the fencing panel components
 - Aluminum post structure for the support framework
- Privacy model configuration for full sightline screening
 - Suited for commercial and industrial fencing applications

OVERVIEW

The Ipe Privacy Model Aluminum Post Kit is a fencing and barrier system combining Ipe wood components with an aluminum post structure, intended for commercial and industrial property enclosures. The privacy-oriented configuration suits perimeter delineation and screening installations where a solid sightline barrier is required.
