

Mid Trellis Post Kit, Walnut Finish, Aluminum Post Construction

- Mid trellis model configuration for moderate-height support spans
- Aluminum post construction for the structural frame
- Walnut finish applied to the exterior surface
- Supplied as a complete kit for trellis-style installation

OVERVIEW

The Walnut Mid Trellis Model Aluminum Post Kit is a structural post assembly designed for trellis-style decorative site installations. It combines a walnut-finished exterior with an aluminum post for the load-bearing frame.

The kit is configured as a mid-height trellis model, suited to applications where a moderate vertical support structure is needed to carry decorative or lighting elements across an open span.

It is intended for commercial and residential outdoor settings where a trellis-style post supports overhead or wall-mounted decorative fixtures.
