OVERVIEW

The Alum-Bond Mirror Gold is a large-format decorative panel measuring 1.22m x 2.44m x 4mm, built with aluminum composite (Alum-Bond) construction using a 0.30mm aluminum skin. It is designed for commercial and architectural interior applications requiring a reflective gold-finish surface.

The panel carries a gold mirror finish and is described as resistant to scratches, fading, and corrosion, supporting use across varied interior environments and decor styles.

The product is backed by a 1-year warranty.
