

## Exterior Slatted WPC Panel, Black, Waterproof & Fire Retardant, Zero Maintenance

### OVERVIEW

The B-W1-B is a black slatted wood-plastic composite (WPC) exterior wall panel designed for commercial and residential facade applications. Manufactured from recycled PVC and wood fiber, it delivers the aesthetic warmth of natural wood with the structural reliability required for exterior use.

The panel is rated waterproof and fire retardant, and is engineered for zero maintenance over its service life. Construction from recycled composite materials resists warping, rot, and moisture degradation without the need for sealing, staining, or refinishing.
