

Exterior Slatted WPC Corner Panel, Light Brown, 2900x50x50mm

OVERVIEW

The B-W1-Corner-LB is an exterior slatted WPC (Wood-Plastic Composite) corner panel finished in light brown, designed for outdoor architectural cladding applications. The corner profile measures 2900x50x50mm and is intended for use at wall intersections and transitions in commercial and residential exterior installations.

Constructed from a wood composite formulation, the panel is described as waterproof, fire retardant, and zero maintenance, making it suitable for exposed exterior environments where durability and long-term appearance retention are priorities.

SPECIFICATIONS

Material	Slatted Wood Composite (WPC)	Dimensions	114.17 x 8.66 x 1.02 in
IP rating	IP65
