

Indoor Slatted Wood Composite Wall Panel – Cherry, 114 in., Waterproof

OVERVIEW

The B-W2-CH is an interior slatted wall panel constructed from recycled PVC and wood fiber composite material in a Cherry finish. Measuring 114 in. in length, 8.6 in. in width, and 1 in. in depth, it is designed for residential and commercial interior wall applications where a warm, wood-aesthetic finish is desired.

The composite construction provides durability and moisture resistance suited for interior environments. The panel's lightweight, manageable profile is intended to simplify installation for contractors and finish trades.
