

Indoor Wood Panel Corner Trim – Cherry Finish, 114-Inch Length

OVERVIEW

The B-W2-Corner-CH is an indoor corner trim piece designed to finish and transition wood slat wall panel installations. With a cherry finish and a 114-inch length, it provides a clean, continuous look at interior corners where wall panels meet.

Constructed from a recycled PVC and wood fiber composite, the trim offers durability and moisture resistance beyond what natural wood provides. The lightweight profile and consistent dimensions simplify handling and cutting on the job site.
