

Indoor Wood Corner Panel – Driftwood Finish, 114-Inch Length

OVERVIEW

The B-W2-Corner-D is an indoor wood corner panel designed for interior wall applications where a warm, natural aesthetic is desired. Constructed from recycled PVC and wood fiber additives, it is suited for residential and light commercial interior installations requiring a corner trim or accent element.

The panel measures 114 inches in length and is made from a composite material that combines the appearance of wood with the durability and moisture resistance inherent to PVC-based construction. The recycled content composition contributes to reduced material waste without sacrificing structural integrity or finish quality.
