

Indoor Wood Panel Corner Trim, Ebony Finish, 114 x 1 x 1 in Recycled PVC Composite

- Corner accessory for indoor wood slat wall panel systems
- Recycled PVC with wood fiber additives for durability and resistance
- 114 × 1 × 1 in profile for full-height corner transitions
- Ebony finish matched to classic style wood slat panels
- Lightweight composite construction for simplified interior installation

OVERVIEW

An indoor corner trim piece used to finish and frame wood slat wall panel installations. Measuring 114 inches in length with a 1-inch by 1-inch profile, it suits interior accent walls, feature walls and architectural detailing where clean corner transitions are required.

The trim is constructed from recycled PVC with wood fiber additives, a composite that provides durability and resistance while retaining the appearance of natural wood slat. The ebony finish delivers a consistent dark tone across runs, and the composite construction keeps handling and installation straightforward for interior fit-out crews.

SPECIFICATIONS

MECHANICAL
