

Indoor Wood Panel Corner Trim,
Jacobean Finish, 114-Inch Length

- Jacobean finish coordinates with matching wood slat wall panels
- 114 × 1 × 1-inch profile covers full-height inside corners
- Composite of recycled PVC with wood fiber additives
- Interior-rated trim for residential and commercial wall systems
- Manageable single-piece handling for on-site installation

OVERVIEW

The indoor corner trim finishes and frames wood slat wall panel installations. Offered in a Jacobean finish, it provides a clean transition at inside corners and contributes to a cohesive appearance in residential and commercial interiors. Each piece measures 114 inches in length with a 1 × 1-inch profile.

Constructed from a composite of recycled PVC with wood fiber additives, the trim offers durability and resistance suited to interior environments. The material composition supports straightforward handling and installation for contractors managing larger wall covering projects.

SPECIFICATIONS

MECHANICAL
