

## Indoor Wood Panel Corner Trim – Provincial Finish, 114" Length

### OVERVIEW

The B-W2-Corner-PR is an indoor corner trim piece designed to finish and accent wood slat wall panel installations. Manufactured from a recycled PVC and wood fiber composite, it provides a clean, cohesive transition at interior corners while complementing the Provincial finish of matching wall panels. At 114 inches in length, each piece covers full wall runs with minimal seaming. The composite construction offers durability and moisture resistance suited for interior environments, and the lightweight profile simplifies handling and installation.
