

## Indoor Wood Corner Wall Panel, White – 114.17 in. Slated Wood Trim

### OVERVIEW

The B-W2-Corner-W is an indoor wood corner wall panel designed for interior accent and finish applications. Constructed from recycled PVC with wood fiber additives, it is intended for use at wall corners and delivers a slatted wood aesthetic suitable for commercial and residential interior spaces.

The panel is manufactured to offer durability and moisture resistance inherent to its composite PVC-wood fiber construction. Its lightweight, manageable form factor is designed to simplify installation without specialized tooling.
