

Indoor Slatted Wood Composite Wall Panel – Old Oak, 114 in., Waterproof

OVERVIEW

The B-W2-OO is a classic-style slatted wall panel constructed from recycled PVC and wood fiber composite, finished in an Old Oak tone. Designed for interior applications, it provides a warm, textured aesthetic suited for commercial and residential accent walls, retail environments, and hospitality spaces. Each panel measures 114 in. in length and 8.6 in. in width, with a 1 in. profile depth, allowing for straightforward installation and manageable handling on the job site.

The composite construction offers durability and moisture resistance inherent to PVC-based materials, and the recycled content formulation contributes to reduced environmental impact. The panel is rated IP65, indicating protection against dust ingress and low-pressure water jets, which extends its usability to areas with elevated humidity exposure.
