

Indoor Slatted Wood Composite Wall Panel – Red Chestnut, 114 in., Waterproof

OVERVIEW

The B-W2-RC is an interior slatted wall panel constructed from recycled PVC and wood fiber composite, designed to bring a warm, wood-look aesthetic to commercial and residential interior spaces. At 114 inches in length with an 8.6-inch width and 1-inch profile depth, the panel is sized for efficient coverage across large wall surfaces.

Built from a recycled PVC and wood fiber blend, the panel offers durability and moisture resistance suited to interior environments. The composite construction resists warping and is designed for straightforward installation, reducing labor time on the job site.
