

## Indoor Slatted Wood Composite Wall Panel – Red Mahogany, 114 in.

### OVERVIEW

The B-W2-RM is an interior slatted wall panel constructed from recycled PVC and wood fiber composite, designed to replicate the appearance of natural wood slats. Intended for indoor accent wall applications in commercial and residential spaces, it provides a warm, textured aesthetic without the maintenance demands of real wood.

The panel measures 114 inches in length, 8.6 inches in width, and 1 inch in depth. Its composite construction offers durability and resistance inherent to PVC-based materials, and the panel format is designed for straightforward installation.
