

Hollow Steel Wall Frame Holder, 12mm W x 100mm H, 8-Piece Bag

OVERVIEW

The BS-10012 Hollow Steel Wall Frame Holder is a steel channel accessory designed to retain and stabilize wall-mounted frames in commercial and residential installations. Sold in an 8-piece bag, each holder measures 12mm wide by 100mm high and is intended to prevent lateral frame movement while protecting frame edges from contact damage.

Constructed from hollow steel, the holder provides structural rigidity suited to repeated handling and long-term wall installations. The hollow profile reduces material weight while maintaining dimensional consistency, allowing frames to seat precisely within the channel without play or shifting.

No certifications, compliance listings, or warranty terms are confirmed in the available source data for this product. Contractors and specifiers should verify applicable local building or display standards prior to installation.
