

Board Support Brush, Silver, 12mm W x 22mm H, 1/2" Dia. Screw, 10-Pack

OVERVIEW

The BS-2212 Board Support Brush in silver is a mechanical support accessory designed to hold and stabilize boards within enclosures, panels, or mounting assemblies. It is commonly used in electrical and signage installations where boards require secure, fixed positioning during assembly or long-term deployment.

The support brush measures 12mm wide by 22mm high and is paired with a mounting screw for installation. The body profile provides a compact footprint suited for tight panel layouts. The silver finish indicates a metallic material construction intended to provide structural rigidity and resistance to deformation under load.

No certifications, compliance listings, or warranty terms are confirmed in the available source data for this product. Contractors and specifiers should verify suitability for their specific application requirements prior to procurement.
