

Board Support Spacer Gold 16mm W x 25mm H, 5/8" Diameter, 6-Pack

OVERVIEW

The BS-2516G is a board support spacer finished in gold, designed to elevate and secure circuit boards, display panels, and similar assemblies during installation. With a nominal width of 16mm and height of 25mm, this compact standoff is suited for applications where consistent board clearance and stable mechanical support are required in space-constrained enclosures or mounting configurations.

The spacer provides a fixed 25mm standoff height with a 5/8-inch diameter footprint, offering a stable base for board retention. The gold finish provides a degree of corrosion resistance suitable for indoor electronic assemblies. Its compact form factor makes it practical for use in control panels, signage driver compartments, and similar light-duty mounting scenarios.

No certifications, compliance listings, or warranty terms are confirmed in the available source data for this product. Contractors and specifiers should verify suitability for their specific application requirements prior to installation.
