

Board Support Standoff, Silver, 19mm W x 25mm H (3/4" Dia.), 6-Pack

OVERVIEW

The BS-2519 Board Support Standoff is a silver-finish mounting standoff designed to secure circuit boards and electronic components within enclosures, panels, and assemblies. Measuring 19mm in width and 25mm in height with a 3/4-inch diameter, it provides a stable, insulating separation between a board and its mounting surface, reducing the risk of short circuits and allowing airflow beneath the board.

Constructed from silver-finish metal, the standoff offers mechanical stability suitable for general-purpose electronic mounting applications across commercial and industrial environments. The compact form factor accommodates boards requiring 1-inch clearance and is intended for straightforward installation without specialized tooling.

No certifications, compliance listings, or warranty terms are confirmed in the available source data for this product. Contractors and specifiers should verify suitability against applicable project requirements and local codes prior to installation.
