

Board Support Spacer, Gold, 16mm Wide x 40mm Tall, 3-Piece Set

OVERVIEW

The BS-4016G Board Support Spacer is a gold-finish, three-piece standoff set designed to mechanically secure and elevate circuit boards, PCBs, and similar electronic assemblies within enclosures or mounting frames. At 16mm wide and 40mm tall, the spacer provides consistent board-to-surface clearance and lateral stability in commercial and industrial electronic installations.

The spacer set is constructed to resist unwanted board movement and vibration during operation. The gold finish indicates a metal construction intended for durability in typical indoor electronic assembly environments. The three-piece configuration allows for standardized spacing across multiple mounting points on a single board.

No certifications, compliance listings, or warranty terms are confirmed in the available source data for this product. Contractors and specifiers should verify applicable regulatory requirements for their specific installation before procurement.
