

Stainless Steel Wall Frame Holder, 18x40mm, 1.57" H x 0.70" Dia., 2-Pack

OVERVIEW

The BS-A4018 is a stainless steel wall frame holder designed for mounting and displaying framed panels in commercial and professional environments. With an 18x40mm profile, it provides a low-profile, secure mounting point suitable for signage frames, certificates, and similar wall-mounted displays. The 2-pack configuration supports symmetrical installations on standard frame sizes.

Constructed from stainless steel, the holder is intended to offer corrosion resistance and structural stability in typical indoor settings. The compact cross-section keeps hardware visually recessed, directing attention to the mounted frame rather than the fastening hardware. Installation is straightforward with a discrete footprint appropriate for finished interior walls.

No certifications, compliance listings, or warranty terms are confirmed in the available source data for this product. Contractors and specifiers should verify applicable load ratings, material grade, and compliance requirements directly with the supplier prior to specification.
